**Reward for your most ethical decision, to forgo a big contract ,
to NOT deliver grass/turf to the authoritarian kingdom of
KATAR for the 2022 World Cup.**

Dear management , dear employees of Hendriks Graszoden.

We, a swiss asset & wealth manager, with great sustainability, social and ethical mind, would like to congratulate you for this brave decision , to put money clearly behind human lives.

We would like to honour your courageous behaviour , your outstanding humanitarian move , your decision not to see your green grass become in everybodys hindsight to have transformed into bloody red colour, because of the loss of lives of 6'500 – six thousand-five-hundred (not the 35 officially reported by government) rightless migrant “slave” workers mentioned by amnesty international.

We are ashamed, that the swiss FIFA organisation SOLD the games to KATAR and all what happened around and went with that, on the other hand we Swiss are proud too, to host a lot of humanitarian organisations like the RED CROSS by Henry Dunant, I guess even he would send you his warmest gratitudes

I hope you enjoy the small thank you Christmas present , maybe it will remind you every day, every hour, every minute, when ever you check the time, of your great job, your great competence, your profession and at most, your great sole and human respect.

I embrace all of you , in the name of all of my board members and employees of my company.

Yours sincerely
